

上海市古美高级中学高一英语分班考试卷

(时间: 100 分钟 满分: 100 分)

II. Grammar Section A (20%)

Directions: Beneath each of the following sentences there are four choices marked A, B, C and D. Choose the one answer that best completes the sentence.

- () 21. Which of the following is right?
A. Do you like animals? \\
B. Yes, I do. \\
C. When did you buy your pet cat? ↗
D. Five years ago. ↗
- () 22. Which of the following underlined parts is different in pronunciation with others?
A. I can recognize him when he came into the room.
B. He likes diving very much.
C. This book is extremely tiny.
D. She tried the skirt on but it didn't fit.
- () 23. Jane had _____ bad cold and she should take the tablets three times a day, two at _____ time.
A. /, a B. a, / C. /, / D. a, a
- () 24. They arrived _____ Paris _____ December the third _____ 8:00 a.m.
A. on, on, at B. in, on, at C. in, on, at D. at, in, at
- () 25. Jane has worked as a doctor _____ twenty years ago. So you can trust him.
A. in B. for C. since D. after
- () 26. Nobody answered the teacher's question _____ Mike, who is the cleverest student in his class.
A. except that B. except C. besides D. except for
- () 27. Their child wasn't listening to them _____.
A. any longer B. no longer C. any long D. no long
- () 28. After the mother was sure all her children were _____, she went to _____.
A. sleep, sleep B. asleep, asleep C. sleeping, asleep D. asleep, sleep
- () 29. _____ lights are very useful in our daily life.
A. Electrical B. Electric C. Electronic D. Electricity
- () 30. She made a big mistake. _____, she lost her job.
A. For the time being B. What a mess
C. As a result D. What's more
- () 31. The girl was _____ to see _____ many nice presents in the Christmas tree.
A. surprising, so B. surprised, so
C. surprised, such D. surprise, such
- () 32. She has _____ books and even herself doesn't know _____ her books.
A. the number of, a number of B. the number of, the number of
C. a number of, the number of D. a number of, a number of
- () 33. His grandpa used to _____ early in the morning. So he was used to _____ up early.

- A. run, getting B. running, getting C. run, get D. running, get
- () 34. He tried his best _____ and finally he succeeded _____ the first prize.
A. to practice, to win B. to practice, winning
C. practicing, to win D. practicing, winning
- () 35. _____ cats is my grandmother's hobby.
A. Raise B. Raised C. Raises D. Raising
- () 36. Neither that book nor this magazine _____ to be taken out of the library.
A. is allowed B. are allowed C. allowed D. allows
- () 37. We tried to make the little girl _____ happy.
A. to feel B. feel C. feeling D. feels
- () 38. --Did you go to Mary's birthday party? -- No, I _____.
A. am not invited B. wasn't invited C. haven't invited D. didn't invite
- () 39. She asked me _____.
A. what's your name B. whether I want to go
C. where my brother has gone D. what was the matter with him
- () 40. -- Would you mind opening the window? -- _____.
A. Of course not B. It's right C. Never mind D. You are welcome

Section B (10%)

Directions: Read the following two passages. Fill in the blanks to make the passage coherent. For the blanks with a given word, fill in each blank with the proper form of the given word. For the other blanks, fill in each blank with one proper word. Make sure that your answers are grammatically correct.

Michelle Obama together with her two daughters and her mother (41) _____ (be) visiting China in this weeklong visit. It is her main task that aims at promoting education and person-to-person exchanges. This visit marks the first meeting between Michelle Obama and Peng Liyuan, (42) _____ husbands run the world's first and second (43) _____ (large) economies and have sought (寻求) to build a new relationship (44) _____ (base) on trust and mutual (相互的) respect. Peng will accompany Obama to the former Imperial Palace, (45) _____ (follow) by a private dinner and a performance. On Saturday, she is to speak at prestigious Peking University, (46) _____ American products and culture are hugely popular and there is a respect for the U.S. first family.

Michelle Obama's decision (47) _____ (visit) China, accompanied by her daughters and mother, is being considered (48) _____ a sign of respect for Chinese society and culture, as well as a way of humanizing the relationship between the two nations. By a similar measure, the glamorous Peng Liyuan, who holds (49) _____ honorary rank equivalent to major general, has broken the mold (模式; 类型) of reticent (寡言少语的), virtually invisible Chinese ladies, using her fame to promote AIDS awareness and other causes.

The Obama women are to fly Monday to the northern city of Xi'an, home (50) _____ the famed Terra Cotta Warriors Museum, then visit a panda breeding facility outside.

III. Vocabulary: (10%)

Directions: Complete the following passage by using the words in the box. Each word can only be used once. Note that there is one word more than you need.

A. expert	B. without	C. civilization	D. employee	AB. invented
AC. popular	AD. attracted	BC. remarking	BD. experienced	CD. From
ABC. established				

The car was invented over a century ago. It has become an important symbol(象征) of ____51____. Cars are so ____52____ in the USA that the country is called “a nation on wheels”. You may know all kinds of car's names, but many people don't know who was the inventor of the first car assembly line (生产线). He was an _____ American _____ called _____ Henry _____ Ford.

Henry Ford was born in a poor family. He was the eldest of six children. When he was a boy, he became ____53____ by watches and machines. When he was twelve years old, his mother died. Soon he had to work in a machine shop in the day and repaired watches in another shop in the evening. As a(n) ____54____, he put his heart into his work and soon he became a(n) ____55____.

At that time, there was another interest in his life. He wanted to make a machine, which could run ____56____ a horse, so it was named “horseless carriage”. He overcame a lot of difficulties and in April, 1893, the “horseless carriage” was ____57____ at last.

Later Henry Ford ____58____ the Ford Motor Company. The car was so profitable that his company soon became one of the most famous in the world. Once Ford gave a speech, ____59____ that the hardship he ____60____ in his early life helped him greatly.

IV. Reading Comprehension (15%)

Section A

Directions: For each blank in the following passage there are four words or phrases marked A, B, C and D. Fill in each blank with the word or phrase that best fits the context.

E-mail systems at thousands of companies and government offices around the world were attacked by a virus called “Melissa” that disguises itself as an “important message” from a friend.

In spite of a weekend of warnings, more than 50,000 ____61____ at about 100 places around the world have been ____62____ by the virus, computer security experts said on Monday.

The ____63____ began to show up last Friday and spread rapidly on Monday by making computers fire off dozens of infected e-mails. Although the virus causes no serious ____64____ to a computer, its effects were far-reaching.

To make matters ____65____, a similar virus called Papa was discovered on Monday.

Papa is programmed to send out even more ____66____ e-mails than Melissa.

The Melissa virus comes in the ____67____ of an e-mail, usually containing the subject line “Important Message.” It appears to be from a ____68____. The body of the e-mail message says, “Here is that document you asked for ... don't show it to anyone else.” Attached to the ____69____ is a document file. Once the

user opens that ____70____, the virus digs into the user's address book and ____71____ infected documents to the first 50 addresses.

E-mails from the Papa virus ____72____ an attached spreadsheet file. When the ____73____ opens that file, the virus sends 60 infected e-mails.

The ____74____ why this is spreading so fast is that you are getting it from people you know. Besides, you should never open documents or attachments from people you don't know. People who get an unexpected e-mail with the "important message" subject line should ____75____ it immediately and not open the message.

Section B (28%)

Directions: Read the following four passages. Each passage is followed by several questions or unfinished statements. For each of them there are four choices marked A, B, and C. Choose the one that fits best according to the information given in the passage you have just read.

(A)

"Everything happens for the best," my mother said each time I faced disappointment or even depression. "If you carry on, one day something good will happen. And you'll realize that it wouldn't have happened if not for that previous disappointment."

Mother was right, which I didn't discover until after graduating from college in 1932. I had decided to try for a job in radio, then work my way up to sports announcer. I hitchhiked to Chicago and knocked on the door of every station—and got turned down every time. In one studio, a kind lady told me that in most cases big stations couldn't risk hiring an inexperienced person. "Go out in the remote areas and find a small station that'll give you a chance," she said. I went back home to Dixon, Illinois.

While there were no radio-announcing jobs in Dixon, my father said Montgomery Ward had opened a store and wanted a local athlete to manage its sports department. Since Dixon was where I had played high school football, I applied. The job sounded just right for me.

But I wasn't hired. My disappointment must have shown. "Everything happens for the best." Mom reminded me. Dad offered me the car to hunt for jobs. I tried WOC Radio in Davenport, Iowa. The program director, a wonderful Scotsman named Peter MacArthur told me they had already hired an announcer.

As I left his office, my frustration boiled over. I asked aloud, "How can a fellow get to be a sports announcer if he can't get a job in a radio station?" I was waiting for the elevator when I heard MacArthur calling, "What was that you said about sports? Do you know anything about football?" Then he stood me before a microphone and asked me to broadcast an imaginary game. The preceding autumn, my team had won a game in the last 20 seconds with a 65-yard run. I did a 15-minute boost to that play, and Peter told me I would be broadcasting Saturday's game!

On my way home, as I have many times since, I thought of my mother's words, "If you carry on, one day something good will happen. Something wouldn't have happened if not for that previous disappointment."

76. We learn from the passage that _____.
- A. the frustration of the author prevented him from performing well at WOC Radio
 - B. both of the author's parents showed support when he was trying to search for a job
 - C. Peter MacArthur recognized the author's talent in broadcasting after reading his resume
 - D. the author lost all his hope and courage when he was turned down by Montgomery Ward
77. What was most likely the author's attitude towards Peter MacArthur?
- A. He was worried that Peter wouldn't believe in his ability.
 - B. He was afraid that his loud inner claim would annoy Peter.
 - C. He was angry that Peter didn't offer him a satisfying position.
 - D. He was grateful that Peter could notice his broadcasting potential.
78. What lesson can you learn from the author's experience in the passage?
- A. Well begun is half done.
 - B. Prevention is better than cure.
 - C. No cross, no crown.
 - D. Rome was not built in a day.

(B)

Australian scientists are trying to give kangaroo-style stomachs to cattle and sheep in order to cut the greenhouse gases they send out, which is thought to be responsible for global warming.

Thanks to special bacteria in their stomachs, kangaroo flatulence (肠胃气胀) contains no methane (甲烷) and scientists want to transfer that bacteria to cattle and sheep who produce large quantities of the harmful gas.

While the usual image of greenhouse gas pollution is a billowing smokestack (烟囱) pushing out carbon dioxide, farm animals' passing wind contribute a surprisingly high percentage of total emissions in some countries.

"Fourteen percent of emissions from all sources in Australia is from enteric methane from cattle and sheep," said Athol Klieve, a senior research scientist with the Queensland state government.

"And if you look at another country such as New Zealand, which has got a much higher agricultural base, they're actually up around 50 percent," he said.

Researchers say the bacteria also makes the digestive process much more efficient and could potentially save millions of dollars in feed costs for farmers.

But it will take researchers at least three years to isolate the bacteria, before they can even start to develop a way of transferring it to cattle and sheep.

Another group of scientists, meanwhile, has suggested Australians should farm fewer cattle and sheep and just eat more kangaroos. And about 20 percent of health-conscious Australians are believed to eat the national symbol already.

"It's low in fat, it's got high protein levels and it's very clean in the sense that basically it's the free-range animal," said Peter Ampt of the University of New South Wales's institute of environmental studies.

79. Scientists intend to put bacteria into cattle and sheep _____.

- A. to prevent them from sending out harmful gases
- B. to help Australian farmers to earn more money
- C. so that they can protect Australian ecosystem
- D. so that they can make full use of special bacteria

80. Athol Klieve seems to believe that _____.

- A. cattle and sheep produce more carbon dioxide
- B. less cattle and sheep are raised in New Zealand
- C. farm animals are to blame for greenhouse gases
- D. New Zealand has the most animals in the world

81. The advantages Peter Ampt lists about kangaroos don't include _____.

- A. it is rich in protein B. is low in fat
- C. it is cheaper than beef D. it is cleaner than sheep

(C)

Too much work, too little money and not enough opportunity for promotion or growth are stressing us out on the job, according to a new survey from the American Psychological Association.

We all know that stress reduces all of the things that help productivity—mental *clarity* (清晰), short-term memory, decision-making and moods. One-third of employees experience lasting stress related to work, the survey found. Fifty-four percent of the 1,501 employed adults surveyed say they feel they are paid too little for their contributions, and 61% said their jobs don't offer adequate opportunities to advance. Only half of the adults surveyed said they feel valued at work.

Besides, women's stress is rising as families rely more on women's earnings. An employed wife's contribution to family earnings has reached, on average, 47% since 2009, so women feel especially stuck and tense. Thirty-two percent of women said their employers don't provide sufficient opportunities for internal advancement, compared with 30% of men. Women are more likely to feel tense during a typical workday, reporting more often that their employer doesn't appreciate what they do.

Physically, the body responds to stress by secreting hormones into the bloodstream that stimulate *accelerated* (加速的) heart rate and breathing and tensing of muscles. People who experience stress as a positive often have increased blood flow to the brain, muscles and limbs, similar to the effects of aerobic exercise. Those who feel frightened or threatened, however, often have an unstable

heart rate and constricting *blood vessels*(血管). Their blood pressure rises and hands and feet may grow cold. They may become **agitated**, speak more loudly or experience errors in judgment.

Emotional responses to stress often divide along gender lines, with men more likely to have a “fight or flight” reaction while women are more likely to have a “tend and befriend” response, seeking comfort in relationships and care of loved ones, according to the research.

Women tend to “internalize”, which contributes to their stress. Many women hesitate to speak up for themselves or challenge behavior they see as unfair. Kay Keaney, interior designer, 40, rose fast at a California medical group, taking on responsibility for interior and facility planning. With her 60-hour workweeks, plus early-morning and late-night meetings and a 1.5-hour commute each way, she seldom had time with her two small children. Whether stuck in traffic on her way to a 6 p.m. pickup at daycare, or torn between her children and urgent work emails, “I just wanted to crawl out of my skin,” she says. “I was overwhelmed.” Yet she hesitated to complain. “There was too much work to be done, and playing the Mommy card was bad form.”

But the experts suggest that women should give themselves a voice.

82. The underlined word “agitated” in Paragraph 4 is closest in meaning to _____.

- A. fearful B. optimistic C. anxious D. ambitious

83. Which of the following statements is **TRUE** according to the passage?

- A. Everyone has a painful sense of being under-appreciated or under-paid.
B. An increasing number of people feel satisfied with work-life balance.
C. An improving job market is making some people’s work lives easier.
D. Most women have higher levels of work stress than the opposite sex.

84. We can learn from the example of Kay Keaney that _____.

- A. relieving oneself from stress involves being frank as well as brave
B. experiencing symptoms of lasting stress causes communication barriers
C. seeking comfort from friends or relatives has little to do with office stress
D. being challenged or devalued by others leads to numerous health problems

85. What is most probably to be discussed in the following paragraphs?

- A. Other aspects in life affected by stress in work.
B. Tips to help women handle their hard times properly.
C. Examples to show the different gender responses to stress.
D. Reasons why people are likely to feel tense when working.

D

University educators largely think highly of the wonders of teaching through technology, but skeptics question whether something is lost when professors and lectures rely too heavily on electronic media or when interaction with students takes place remotely — in cyberspace rather than the real space of the classroom. Hans Ulrich Gumbrecht, the Professor of Literature at Stanford University, is one such skeptic. “I think this enthusiastic and sometimes childish and blind pushing toward the more technology

the better, the more websites the better teacher, and so forth, is very dangerous — is, indeed, suicidal,” he indicates.

However, Gumbrecht warns that there are few, if any, studies either supporting or rejecting the hypothesis that traditional ways of teaching are superior to teaching via the Internet. He says that he could point only to his “intuition that real classroom presence should be maintained,” and emphasizes the need for educators to examine critically where technology serves a useful *pedagogical* (教学法的) function and where it does not.

Yet, Gumbrecht allows that, for courses in which knowledge transmission is the sole purpose, electronic media probably can do the job well enough. Indeed, given the 20th century’s knowledge explosion and the increasing costs of higher education, using technology as opposed to real-life teachers for the transmission of information is probably inevitable, he admits. In any case, knowledge transmission should not be the core function of the university, he maintains, noting that universities should be places where people confront open questions, places for “intellectual complexity” and “riskful thinking”.

“We are not about finding or transmitting solutions; we are not about recipes; we are not about making intellectual life easy. Confrontation with complexity is what expands your mind. It is something like intellectual gymnastics. And this is what makes you a suitable member of the society.”

Moreover, discussions in the physical presence of others can lead to the intellectual innovation. “There’s a qualitative change, and you don’t know how it happens. Discussions in the physical presence have the capacity of being the *catalyst* (催化剂) for such intellectual breakthroughs. The possibility of in-classroom teaching — of letting something happen which cannot happen if you teach by the transmission of information — is a strength.”

86. Which of the following is the best title to this passage?

- A. Cyberspace Interaction
- B. The Core Function of the University
- C. Information Transmission Cannot Help You Survive
- D. Electronic Teaching Arouses Uncertainty

87. Which of the following might Professor Gumbrecht support?

- A. Professors should be keen on teaching technique innovation.
- B. Technologies applied to classrooms strengthen creative thinking.
- C. Traditional pedagogical function has its place in classroom.
- D. The core function of the university is to focus on knowledge transmitting.

88. Cyberspace teaching could replace real-life teachers **EXCEPT** when _____.

- A. transmitting knowledge is the only purpose of the course
- B. there’s too much knowledge to put across to the students
- C. the cost of college education increases greatly
- D. open questions without possible answers are encouraged

89. According to the passage, discussion in the physical presence of others can _____.

- A. lead to greatly improved intellectual abilities
- B. lead to easier and stronger transmission of information

- C. produce certain energy for intellectual breakthroughs
D. produce qualitative change in teacher-students relationships

Translation 17% (前三句各 3 分, 后两句各 4 分)

Directions: Translate the following sentences into English, using the words given in the brackets.

90. 不要让吸烟剥夺你的健康。 (rob sb. of sth.)

91. 待人和善是保持友谊的关键。 (maintain)

92. 因为大雾, 我们不能保证运动会会准时举行。 (guarantee(保证) that)

93. 为了吸引学生的注意力, 老师努力使课堂变得更加有趣。 (attract)

94. 我的哥哥决定在一家大公司做第一份工, 那样他可以得到更多的经验。 (so that, 划线部分用被动语态)
